UVA VC Conference Sponsorship Opportunities

The Richard A. Mayo Center for Asset Management at the UVA Darden School of Business invites you to join us for the University of Virginia Venture Capital Conference (UVAVCC). This year, UVAVCC will explore the current landscape of Venture Capital and how market conditions are affecting the space from an LP, GP and entrepreneurial perspective. Panel sessions will focus on various investing sectors such as cyber security, defense technology, healthcare, and consumer packaged goods. Program speakers will also detail approaches and ideas for how LPs invest given current market conditions and how entrepreneurs can successfully pitch to VCs. UVAVCC will close with a networking reception open to all conference participants.
